timing: need to get this right and roll it out

Concerns about health

Context

What would be best possible alternative available to resin for a contemporary communal-use print studio?

Question: recurring problems with air brush clogging

Method

- test systematically for
 - clogging
 - adherence
 - ease of sourcing
 - ease of mixing
 - shelf-life
 - ease of disposal
 - visibility on plate
 - cost
 - toxicity
 - do fine and coarse?
- versatility
- compatibility with...

(minimal or no extraction system available)

New Products out each month
 don't want to be reinventing the wheel; keep others well informed, prompting input about concerns environment

different materials
 different mordants
 different stop-outs
 different resists

Many not be one definitive answer
